

TYPES OF PAPERS

The Journal of Bioanthropology publishes original scientific papers, brief communications, review papers and professional papers in the fields of biological anthropology, including bioarchaeology, biomechanics, biomedicine, ergonomics, forensics, genetics, human evolution, public health, and related subjects. Our particular attention is towards interdisciplinary approaches.

MANUSCRIPT SUBMISSION

Manuscripts must be written in concise English.

Manuscripts containing original material are accepted for consideration on the understanding that the material has neither been published previously (except in form of an abstract) nor is under consideration for publication elsewhere and that its publication is approved by all coauthors. With delivery of the manuscript for publication and the subsequent acceptance by the Editor, authors of articles published in Journal of Bioanthropology retain the copyright of their articles and are free to reproduce and disseminate their work upon publication. Authors also grant any third party the right to use the article freely as long as its integrity is maintained and its original authors, citation details and publisher are identified.

All submitted material is subject to a peer-reviewing process by the editors and external experts. The authors are encouraged to propose up to five names of potential reviewers, but the editors reserve the right of final selection.

All authors submitting their article for publication have to agree to the Authorship statement.

IMPORTANT: Authorship statement form needs to be signed by all co-authors, scanned and sent to Journal of Bioanthropology office. Please note that the manuscript will not be processed until journal office receives a valid Authorship statement form!

STRUCTURE OF THE MANUSCRIPT

Manuscripts should be submitted in .doc compatible format. Use 12-point Times Roman font, double-spaced throughout the manuscript. All pages should be numbered in Arabic numerals, starting from the title page, with numbers in the bottom right corner. Do not use field functions. Use tab stops or other commands for indents, not the space bar.

Figures

Figures must be numbered consecutively. The number of figures must be kept to a minimum consistent with the clarity of the text and should not repeat numerical data presented in tables or text. Numbers, symbols, and lines must be of a size sufficient for easy reading after appropriate reduction of the figure to fit the column width. Each figure must be accompanied by a brief self-explanatory legend, which includes a definition of all symbols and abbreviations used in the figure. Submit all figures as separate files and do not integrate them into the text file; the file names should include the relevant number of the figure (e.g. Fig 1). Acceptable file formats are: .jpg; .tif; .png (min 300 dpi)

Do not use presentation programmes (e.g., PowerPoint) or files downloaded from the internet to submit figures; in most cases, data cannot be processed.

Preparing your manuscript

Title page

The title page should include:

- title of the paper
- list the full names and institutional addresses and e-mails for all authors
- indicate the corresponding author

- abstract
- keywords

Abstract

The abstract should briefly summarize the aim, findings or purpose of the article. Please minimize the use of abbreviations and do not cite references in the abstract. The Abstract must not exceed 250 words and should not contain references or abbreviations.

Keywords

Three to five keywords representing the main content of the article.

Parts of the manuscript

Manuscript should contain the following parts: Introduction, Materials and methods, Results, Discussion, Discussion, Conclusion, Acknowledgements, Figure captions, References

Introduction

The Introduction section should introduce the study topic and give all relevant background information on the given topic of study, including theoretical issues

Materials and methods

Materials and methods section should have all relevant information on materials and methods used in the analysis, including the research design, description or appropriately cited references for methods used in the analysis. Studies involving human participants, data or tissue or animals must include statement on ethics approval and consent.

Results

This section should list all relevant results of the study, including statistical data (if appropriate)

Discussion (can be combined in 'Results and Discussion' section)

For research articles this section should discuss the implications of the findings in context of existing research and highlight limitations of the study. For methodological papers, this section should include a discussion of any practical or operational issues involved in performing the study and any issues not covered in other sections.

Conclusions (can be combined in „Discussion and Conclusion“ section)

This should state clearly the main conclusions and provide an explanation of the importance and relevance of the study to the field.

Acknowledgments

This section contains appropriate acknowledgements to funding agencies, Institutions or individuals that provided financial or other type of support relevant to the study.

Figure captions

Figure captions should be referenced in the text as (Fig. 1, Fig. 2 and so on) and a full list of figures with acknowledgements (if appropriate, e.g. photo credits) should be given at the end of the paper.

References

Bibliographic references must be reported in alphabetic and chronological order in the text (e.g. Meindl & Lovejoy, 1985). For more than two authors use first author's last name followed by et al. and publication year). List of full references is listed in the reference section.

Example reference style:

AFTER ACCEPTANCE

Online First

The accepted article will be published online after receipt of the corrected proofs. Reviewers will suggest the final categorization of the paper (i.e. original scientific paper, brief communication, review paper, professional papers) but the final decision is the responsibility of the editor.

This is the official first publication citable with the assigned DOI. The electronic edition of your article will be available at <http://inantro.hr/journal-of-bioanthropology/>

CORRESPONDENCE

All submissions, inquiries and correspondence should be sent to editorial office at: editors@inantro.hr
